

Quality policy

Our vision is to make the world better via brilliant innovations. To achieve our vision we need to meet our customer's expectations through excellent Quality, both in our way of working and our products and services. Our management system shall be certified according to ISO 9001 to assure that we constantly improve with our customers in mind.

Climeon's quality policy means that we should:

Consider methods and materials during development to ensure high quality and low environmental impact through the product lifecycle.

Work closely with our customers and partners to get feedback on our products and thus ensure that we create high values.

Ensure that employees, suppliers and other partners understand that they are required to report relevant deviations and work actively with continuous improvements.
